SAP's latest offering, the next generation business Suite for HANA or S/4 HANA comes with the best enterprise SAP solutions till date, designed to meet ever increasing demands of the customers in this digital economy. S/4 HANA is fast becoming the go-to solution for enterprises where performance and processing power is utmost importance and provides its customer more time to concentrate on the things that matters to them.

The planned SAP S/4HANA implementations and innovations require SAP HANA, so migration to SAP HANA is a matter of “how” instead of “if” and “when” to implement them.

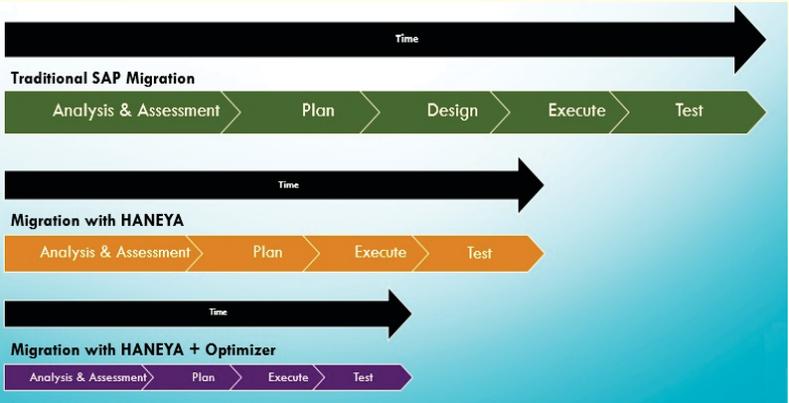

Migrating to S/4 HANA is a challenge for many companies, yet they want to take advantage of latest technology offerings with table simplifications, optimized data footprint, enhanced user experience and real time data access in the enterprise management solutions. The main challenge for the customers is to establish a business specific road-map and strategy to migrate to S/4 HANA with minimal interruption to business. The key question is how to overcome these migration challenges. Our solution to your challenge and dilemma is HANEYA®. HANA migration from current non- SAP databases such as Oracle, DB2 on Z/OS, MSSQL, SYBASE to HANA database don't need to be a difficult and lengthy process with HANEYA®.

VisionSoft Consulting (Vsoft) specializes in S/4 HANA migration, implementation and integration for a number of industries. With our solutions, we make the migration process seamless and re-engineer your business processes making it more productive than ever before.

## Value Proposition

### Value Proposition:

- 40-50% Speed to implementation – Custom objects and Std. Tcodes
- Optimizes the down time (~Achieves Near ZDT with migrations)
- Extension to SLT 2.0 – Optimization of OS/DB conflicts
- Rapid Data Conversion and Migration –address longest pole in the tent
- HANEYA Optimizer identifies custom objects, reports and scan for conflicts or obsoletes in the current SAP system and replaces the conflicts automatically and speeds up the migration process by almost 30-50%.

## Features and Functions

HANEYA is a Pre-packaged HANA extension and accelerator solution that encapsulates all migration activities together to handle your S/4 HANA migration in an automated way with minimal human

<h3>Assessment</h3> <ul style="list-style-type: none"> <li>● What it takes to go from SoH and ECC to S/4 Enterprise?</li> <li>● How many custom objects and Std. Conflicts?</li> <li>● What it takes for Unicode conversion and EhP upgrade?</li> </ul>	<h3>Upgrade</h3> <ul style="list-style-type: none"> <li>● Standard and Non-standard conflicts from EhP4 to 7.0</li> <li>● EhP7.0 to S/4 HANA</li> <li>● Optimizer will automatically resolve these conflicts</li> <li>● Reduce upgrade effort 40-50%</li> </ul>
<h3>Migration</h3> <ul style="list-style-type: none"> <li>● ECC to SoH</li> <li>● ECC to SoH with Simple Finance</li> <li>● ECC to S/4 Enterprise Management</li> <li>● SoH to S/4 Enterprise Mgt.</li> <li>● SoH to S/4 Finance</li> </ul>	<h3>Post Migration</h3> <ul style="list-style-type: none"> <li>● Table consistency checks.</li> <li>● Repair inconsistencies</li> <li>● System copy adjustments</li> <li>● LRU Buffers clearing</li> <li>● Landscape transformation</li> </ul>
