

HANElytics®

HANElytics™ is an advanced AI/ML platform that seamlessly integrates data modeling, algorithms, machine learning, and statistical analysis to derive actionable insights from both ERP and non-ERP data sources. It facilitates real-time predictions, process automation, and data-driven competitive advantages, revolutionizing supply chain management.

Key Features:

AI/ML Cloud Solution: Integrates diverse non-SAP sources such as Salesforce, IoT, Digital Media, GIS, and Sensor data, alongside SAP S/4 HANA Cloud and Microsoft ERP systems, providing a comprehensive data integration capability.

Real-Time Analytics: Offers powerful visualization and predictive analytics using leading tools like Power BI, Tableau, and Alteryx Designer, ensuring data-driven decision-making.

Predictive Capabilities: Leverages advanced AI/ML models to predict inventory needs, equipment failures, and customer demands with high precision, enhancing operational efficiency.

How HANElytics helps:

Supply Chain Predictions: Enhances accuracy in predicting inventory levels and safety stocks, optimizing supply chain management to prevent overstock and stockouts.

Risk Mitigation: Anticipates disruptions and suggests proactive measures, ensuring uninterrupted business operations and minimizing risks.

Customer Satisfaction: Increases customer satisfaction and loyalty through accurate demand sensing and prediction, ensuring timely delivery and availability of products.

Value Proposition

Integration & Scalability: Seamlessly integrates with existing IT systems, providing scalable solutions that support business growth and adaptability.

Data Harmonization: Utilizes advanced tools to blend data from multiple sources, improving data quality and accessibility, enabling comprehensive insights.

Advanced Analytics: Employs predictive insights and automation to optimize supply chain processes, leading to significant cost savings and operational efficiencies.

Supply Chain Efficiency: Streamlines decision-making processes, reduces lead times, and optimizes inventory management, resulting in compelling cost savings and improved operational performance.

Risk Mitigation: Predicts potential disruptions and implements proactive measures to manage risks effectively, achieving a remarkable 99.99% customer fill rate.

Customer Satisfaction: Enhances demand forecasting and delivery accuracy, boosting customer satisfaction and fostering loyalty.

HANElytics®

Rapid Deployment: Ensures faster time-to-value with quick deployment of AI/ML models, supported by pre-configured predictive data models customizable to client needs.

SaaS Model: Delivered as a cloud subscription service, HANElytics™ lowers the total cost of operation (TCO) while providing flexibility and ease of access.

ERP Integration Specialists: Expertly integrates AI/ML models with ERP systems, maximizing the utility of existing infrastructure.

Alteryx-Powered: Efficiently connects and processes data from diverse ERP and non-ERP sources using Alteryx, enabling seamless data manipulation with minimal effort.

HANElytics™

Customer Success Story:

"Implementing HANElytics™ transformed our supply chain management. By precisely predicting inventory needs and potential disruptions, we achieved significant cost reductions and improved customer satisfaction. The AI/ML capabilities provided real-time, actionable insights, driving better business outcomes." – *Terumo Medical Corporation*
