HANEYA

SAP® Certified
Integration with SAP HANA®

"HANEYA™ - Cut your HANA Migration Costs in Half"

HANEYA™, our pre-packaged migration solution encapsulates all migration activities together to handle the SAP HANA migration for SoH and S/4 HANA in an automated process with minimal human interaction and **optimizes the cost and effort by 40-50%**. HANEYA is a custom code remediation and migration tool that remediates custom code incompatibilities, replaces obsolete transactions and obsolete tables, and updates security roles automatically. It will also facilities Near Zero Down Time(NZDT) conversion and Change management / Training with S/4 HANA and Suite on HANA (SoH) migrations, as change to the business could be daunting. It automates testing for changed functionalities as well. In summary, Leave Migration to HANEYA and you focus on your business!

HANEYA's proven methodologies, and capabilities of migration enable us to help our clients in their journey to SAP HANA and making the migration smooth, rapid, and easier allows our clients to take advantage of SAP HANA's in-memory, column-oriented capabilities as early as possible by making implementation very fast with minimal downtime, saving on Time and Cost and improving return of investment.
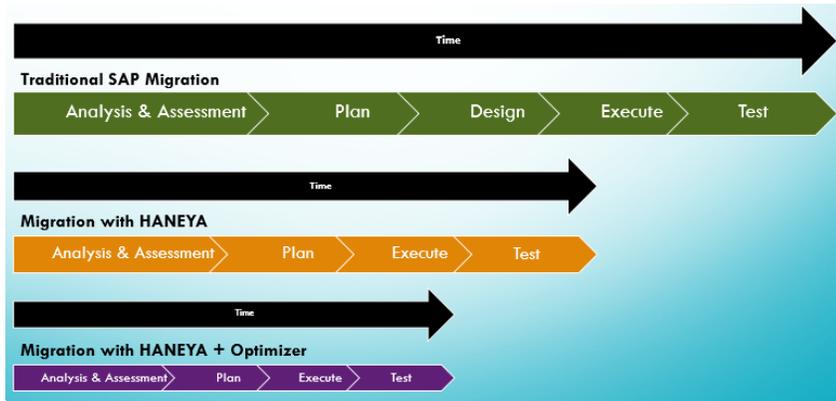

HANEYA will support single tenant and multi-tenant migrations and also supports migrations with acquisitions and divestitures. HANEYA is being implemented at **Hetero Drugs, Hetero Healthcare, Eco Store, Essar, and Major Manufacturer in Srilanka.**

HANEYA offers SAP S/4 HANA migration implementations across industry verticals:
- Retail
- Consumer Products
- Life Sciences
- Insurance
- Wholesale Distribution and
- Manufacturing

Value Proposition:

- HANEYA identifies Custom objects, Tables and Transactions, scans for conflicts or obsoletes in the current SAP system, and replaces the conflicts automatically and speeds up the migration process by 40-50%.
- Reduces 40-50% of Effort, Time and Cost
- Optimizes the down time (~Achieves Near ZDT with migrations)
- Extension to SLT 2.0 – Optimization of OS/DB conflicts
- Rapid Data Conversion&Migration - address longest pole in the tent

Features and Functions

Features and Functions

HANEYA is a Pre-packaged HANA extension and accelerator solution that encapsulates all migration activities together to handle your S/4 HANA migration in an automated way with minimal human interaction.

Assessment	Upgrade
- What it takes to go from SoH and ECC to S/4 Enterprise? - How many custom objects and HANA Conflicts? - What it takes for Unicode conversion and EhP upgrade?	- Standard and Non-standard conflicts from Ehp4 to 7.0 - Ehp7.0 to SoH conflicts remediation - Optimizer will automatically resolve these conflicts - Reduce upgrade effort 40-50%
Migration	**Post Migration**
HANA incompatibilities remediation: - ECC to SoH - ECC to SoH with Simple Finance - ECC to S/4 Enterprise Management - SoH to to S/4 Enterprise Mgt. - SoH to S/4 Finance	- Table consistency checks - Repair inconsistencies - System copy adjustments - LRU Buffers clearing - Landscape transformation
